

## Installation Instructions

### **Ensure Your Weapons Is Unloaded Prior to Handling!**

The ZeroBravo Reversible Hand Stop (RHS) is designed to be used in different mounting options depending on the customer's requirement and preference.

- Using a 3/32" hex key wrench, unscrew the screw on the bottom of the RHS until the KeyMod Nut is able to rotate out of the body of the RHS.
- With the RHS oriented in the desired direction for mounting, rotate the KeyMod Nut so that that the flat side of the Nut is facing the rear of the rail and the extended lip portion is facing the front of the rail.
- Retighten the hex key screw so that the KeyMod Nut will not freely rotate outside of the body of the RHS.
- To install onto your rail, insert the KeyMod Nut into the opening in the KeyMod slot and slide forward.
- Using a 3/32" hex key wrench, tighten the screw at the bottom of the RHS until the tight against your rail.
- Do not over tighten.
